

NAFIZ RIFAT

Full-Stack .NET Engineer | .NET 8 · C# · SQL Server · Angular · Kendo · JS

Retail | Healthcare | Enterprise Systems

US Master's in Software Engineering (NDSU) | Green Card / Permanent Resident

(701) 936-2378 · nafiz.rifat@outlook.com · [linkedin.com/in/nafiz-rifat](https://www.linkedin.com/in/nafiz-rifat) · nafizrifat.com

PROFESSIONAL SUMMARY

- Full-Stack .NET Engineer with **10+ years** of experience delivering enterprise applications across **retail, healthcare**, education, state government, and ERP domains; currently supporting mission-critical invoice processing and AP vendor-management systems at Publix Super Markets.
- Strong expertise in **C#, .NET 8, ASP.NET Core, Web API, SQL Server**, Entity Framework, LINQ, **Angular 16, Kendo UI**, WPF, Windows Forms, and enterprise application development.
- Proven background building scalable web, API, desktop, reporting, ETL, and data-driven systems, including **invoice management, infusion pump server software, HR/payroll, accounting & sales, inventory/POS**, pharmacy, and university management applications.
- Hands-on experience with **REST API design**, system integrations, **SQL Server optimization**, stored procedures, reporting, high-volume data processing, and production troubleshooting.
- Experienced in Agile delivery, full SDLC, requirements analysis, debugging, release validation, Azure DevOps/Git workflows, mentoring, and leading small engineering teams.
- Use **AI-assisted development** tools such as **GitHub Copilot** and internal AI assistant to accelerate feature delivery, improve debugging, support unit testing, and reduce development time while maintaining code quality.

TECHNICAL SKILLS

Languages	C#, JavaScript, SQL, Visual Basic, TypeScript
Backend	.NET 8, C# 12, ASP.NET Core, ASP.NET MVC, Web API, WCF, WPF, Windows Forms, Entity Framework, ADO.NET, LINQ
Frontend	Kendo UI, Angular 16, jQuery, HTML5, CSS3, Bootstrap, RxJS, NgRx, PrimeNG, AJAX, JSON, ES6
Databases	SQL Server, T-SQL, Stored Procedures, Functions, Triggers, Query Optimization, Indexing, PostgreSQL, Oracle, MySQL, MongoDB
Reporting / ETL	SSRS, Crystal Reports, ETL pipelines, HL7 / EMR integrations
Testing	MSTest, NUnit, xUnit, Moq, NSubstitute, SpecFlow/BDD, Unit Testing, Mocking, LeanFT, HP UFT
DevOps / Tools	Git, Azure DevOps, Jenkins (CI/CD), JIRA, Postman, Visual Studio, VS Code

PROFESSIONAL EXPERIENCE

Publix Super Markets, Inc. — .NET Software Engineering Consultant

Jan 2025 – Present

Via Smartworks LLC | Remote | Florida, USA

Project: DIPS — Invoice Processing & AP Vendor Management System

- Develop and support DIPS, a mission-critical enterprise platform for vendor invoice processing, payment auditing, and AP vendor-management workflows at scale.
- Designed and delivered a new Invoice Bulk Update module that automated bulk invoice-update workflows and reduced manual effort by approximately 70–90%.
- Optimized complex SQL Server queries and stored procedures, reducing query execution time by approximately 30–50% for high-volume invoice operations.

- Resolve production issues and refactor legacy code across application, database, and UI layers, improving system stability and support turnaround time.
- Extend backend business logic, REST APIs, and system integrations for new functional modules, improving workflow accuracy, data consistency, and usability.
- Enhance front-end workflows using Kendo Grid, dynamic filters, and custom UI components built with .NET 8, C# 12, and Kendo UI.
- Partner with QA, business analysts, and support teams to validate requirements, verify fixes, and deliver reliable releases through Azure DevOps and Git.

Tech Stack: .NET 8, C# 12, ASP.NETCore/MVC, Kendo UI, MS SQL Server, T-SQL, Entity Framework, LINQ, JavaScript, HTML/CSS, Git, Azure DevOps

TCC Solutions — .NET Software Developer II

Apr 2024 – Jan 2025

Via Smartworks LLC | Remote | Indiana, USA

Project: NC Ascend — Child Development & Early Education Management System (North Carolina State)

- Developed and maintained the statewide Child Development and Early Education Management System serving North Carolina.
- Built backend modules using **C#, ASP.NET, WCF, Web API**, and SQL Server; optimized queries and stored procedures for complex data operations.
- Developed **Angular 16** pages and features using RxJS, NgRx, and PrimeNG to support responsive and user-friendly application workflows.
- Designed **REST API integration layers** connecting the main system with legacy platforms; supported ETL-based data import, transformation, and migration across databases.
- Resolved 50+ bug tickets across backend, frontend, SQL, and integration layers, improving system stability and delivery quality.
- Collaborated with BAs, QA, and developers to gather requirements, verify user stories, and deliver features in an Agile environment.

Tech Stack: C#, ASP.NET, Angular 16, RxJS, NgRx, PrimeNG, SQL Server, Stored Procedures, ETL, RESTful Web API, .NET Core

ICU Medical (Formerly Smiths Medical) — .NET Software Engineer II

Jun 2020 – Apr 2024

Full Time | Hybrid | Minneapolis, MN, USA

Project: PharmGuard System — Medical Infusion Pump Server Software (FDA-Regulated)

- Designed and maintained FDA-regulated **Medical Infusion Pump** monitoring software using C#, ASP.NET MVC, WCF, Web API, SQL Server, and Kendo UI.
- Improved application security and maintainability by applying **HTTPS, AntiForgery Token validation**, Visual Studio Code Analysis, and secure RESTful service practices.
- Developed and maintained automated test suites using **MSTest, LeanFT, and SpecFlow**; performed manual and automated pump verification testing to support regulated release cycles.
- Optimized SQL Server queries and indexing strategies, **including columnstore, clustered, and spatial indexes**, improving SSRS report performance on datasets exceeding **100M records**.
- Enhanced **ETL pipelines** for processing pump messages, logs, and device data; validated device-to-HL7 message transformations for EMR integration workflows.
- Maintained the PharmGuard Administrator C#/ASP.NET desktop application for pump registration, configuration, and medication safety management while supporting SQL Server database reliability.

Tech Stack: C#, ASP.NET MVC 5, Kendo UI, MS SQL Server, SSRS, ETL, HL7, SpecFlow, MSTest, LeanFT, RESTful Web API, Jenkins, GitHub, Agile

NDSU Dining IT — .NET Software Developer

Jan 2019 – May 2020

Part Time | Onsite | Fargo, ND, USA

- Designed and maintained an **ETL-based Data Warehouse application** using C# and SQL Server to collect real-time data from multiple NDSU Dining legacy systems into a centralized database.

- Built RESTful APIs and a real-time dashboard Web API to expose warehouse, inventory, and operational data to downstream systems.
- Developed SQL queries, stored procedures, functions, import/export features, and operation logging to support reporting and data integration workflows.

Tech Stack: C#, MS SQL Server, ETL, RESTful API, SSRS, Stored Procedures, CSV/XML

ICU Medical (Formerly Smiths Medical) — .NET Software Intern

May 2019 – Jul 2019

Internship | Onsite | Minneapolis, MN, USA

Project: PharmGuard Device Reports

- Analyzed legacy stored procedures to identify performance bottlenecks and implemented columnstore, clustered, and spatial **SQL indexing** strategies to improve SSRS report loading performance.
- Contributed to device-message XML parsing and built a synthetic-data comparison tool to benchmark, validate, and measure performance improvements.

Tech Stack: C#, MS SQL Server, Stored Procedures, SQL Functions, SQL Indexing, Device Event XML

.NET Software Engineer (Full-Stack)

Sep 2016 – Jul 2018

Azolution Software & Engineers Limited — Dhaka, Bangladesh

- Developed enterprise HR & Payroll Management systems using ASP.NET MVC, C#, Entity Framework, Angular, Kendo UI, and MS SQL Server; contributed to Attendance, Leave, Payroll, and Roster modules.
- Led a team of 5–10 engineers, overseeing full-stack delivery across HR, Inventory Management, and Pharmacy Management applications.
- Built C# Windows Forms applications for POS, inventory, and pharmacy workflows, including online/offline synchronization using Windows Services.
- Developed Windows Service integrations for bulk email processing and built real-time analytical dashboards with amCharts.

Tech Stack: C#, ASP.NET MVC 5, Windows Forms, Kendo UI, Angular, MS SQL, Entity Framework, jQuery, N-tier Architecture

Web Developer .NET (Full-Stack)

Jan 2015 – Aug 2016

Drins Tech Limited — Dhaka, Bangladesh

- Contributed to full-stack development of **University Management** and **Accounting & Sales** enterprise applications, supporting modules such as Admissions, Registrar, Student, Advising, HR-Payroll, and sales operations.
- Designed database schemas and developed stored procedures, functions, triggers, indexes, views, and constraints using T-SQL and PL/SQL to improve data processing and application performance.

Tech Stack: C#, ASP.NET Web API, Entity Framework, MS SQL, PL/SQL, HTML5, AngularJS

EDUCATION

Master of Science in Software Engineering

2018 – 2020

North Dakota State University, Fargo, ND, USA — GPA: 4.0 / 4.0

Bachelor of Science in Computer Science & Engineering

2010 – 2014

Stamford University Bangladesh, Dhaka, Bangladesh — GPA: 3.7 / 4.0
